

Kelvin Osoro

Kelvin is 20 years old and completed high school in 2017. He will be starting his first year Moi University in September 2018, where he will study Education. He was first introduced to art and painting when he joined Uweza's art program when it first launched in 2011.

The subjects and themes that he enjoys painting include abstracts, landscapes, and realism. He hopes, through his work, to convey positive messages about Kibera, Kenya, and Africa.

His greatest challenge so far in life is a lack of school fees for his education. It is only through the sales of his artwork that he was able to complete high school and will be starting university.

In the future, he dreams of becoming a teacher and also continuing to pursue his talent as an artist. Participating in Uweza Art Gallery has helped him through paying his school fees and providing him exposure to artists, exhibitions, and parts of Kenya that he might not otherwise have visited.
